Ginseng (*Panax*) from Naturally Norfolk, Ontario - Sliced Fresh Ginseng Report.

Ginseng is a slow-growing herbaceous perennial. In North America and Asia. *Panax quinquefolius* is the species cultivated in North America. Botanically, it differs slightly from the principle species native to Asia, *Panax ginseng*. This family includes wild sarsaparilla, dwarf ginseng and spikenard. All of these plants can be found in the forests of Ontario. The climate and soils of South Central Ontario are ideally suited to the production of ginseng.

Sample	Analyte	Results
